

Feedback about “Objects and their Weight”

18~24.Aug.2014

Room12 Primary School in Perth Australia

(All names are a pseudonym.)

Did you understand about “Objects and their Weight”. Were these lessons enjoyable for you? Please write your feedback in detail. What do you understand?

After the name is the evaluation (A: very enjoyable or B: enjoyable).

●These lessons were very enjoyable and I understood all of them. It was interesting to see the different weights of objects and that if you add 2 volumes together (Ex.200+300 \neq 500) it's a bit less than the starting amount, but the weight always stays the same. I will miss you teachers very much, and I wish you could stay. Come back and visit Australia again!

A A

●These lessons were very enjoyable and really good. I understood everything they said it was very helpful for me and I learned about of things about “Objects and their Weight”. Thank you for teaching us about “Objects and their Weight”.

B A

●I thought these lessons were very enjoyable and I could learn a lot about objects and weight and I got to have a lot of fun with doing science because sometimes science can be boring but when we do it with Japanese teachers it is very interesting. Thank you.

C A

●I thought that over all those lessons I think that you guys were very good and though you don't know a lot of English you spoke very well. I hope you can come back next time. I learnt a lot of science. Please don't stop teaching science.

D B

●I thought it was very fun having you teach us science and I learnt quiet a lot of science. I hope you had awesome! 2weeks at Australia and thank you for coming to this class.

E B

●I understood most of the things we were taught and found the lessons very enjoyable. I think the story of Professor Santario Santario a very fascinating thing. I want to learn more when you come back (that's just if you come back).

Thank you for coming to Australia and teaching us about “Objects and their Weight”

P.S keep teaching!!!!!!!

F A

●I found these lessons enjoyable because we got to do lots of hands on experiments. I learnt a lot of things like just because an object has changed its form doesn't mean it will weigh less or more and I also learnt just because you can't see something doesn't mean it's not there. I will miss you both very much always keep teaching.

G B

●I highly understood everything that was being said and I really enjoyed the lessons. I

loved how you did the experiments instead of just saying the answers. I found it enjoyable because you are learning things from a new perspective. I will really miss you! Come back next year! (P.S the test was quite easy) H A

●I found these lessons very enjoyable! These lessons were very interesting. I found out a lot more about weight than I already knew. It seemed like at first that “Oh we’re doing weight so what? I already know that stuff”, but then when we started it was so interesting and I found a lot out! I A

●I found these lessons very enjoyable and interesting and I have learnt a lot from you about science and weight. And I really enjoyed your experiments, especially the salt water experiment which was really cool as I learnt how much salt is in saltwater. Thanks to you now I can’t wait for more science. Thank, I wish you could stay forever. You are the best science teachers ever. J A

●The lessons were very enjoyable because I learnt a lot of new science using weight and volume. I really wanted to have more lessons because they were so fun and enjoyable!!! I hope you come back to Australia soon and teach more science. K A

●This was probably the most interactive science lesson I’ve ever had. We haven’t had many science lessons but this still is at the top of the list. I really like your style of teaching. Hiro and I wish you good luck in the future. L A

●The lessons more very enjoyable. Thank you for coming in room12. I had lots of fun and learned a lot about science. I wish you could stay and teach as best science teachers in the world! M A

●I loved your lessons. I thought they were very enjoyable, interesting and enjoyable. I learnt a lot about Objects and their Weight. I wish you could stay. N A

●The lessons were very enjoyable because we had some funny parts, learnt a lot and had fun. I wish you can stay in Australia but you had to go, please come back next year. O A

●I understood “Objects and their Weight” and they were very enjoyable. I learnt a lot of new things about science like the water and alcohol. Arigato, Malachi. P A

●I loved your lessons because I learnt so much about weight and mass. Some was hard and some was easy thanks a lot. Q A

●I enjoyed the lessons a lot because we had fun as well as learning science! I have learnt a lot of things and have loved how you do the experiments to prove it is true. I learnt that no matter what position you put something in as long as you don’t take anything away it weighs the same! R A

●I liked all the lessons we had were taught and I'm hoping that you could can come again and teach us. I had a very good time with you and very sad that you're all going back to Japan. S A

●These lessons you gave us were awesome, thank you so much for coming and teaching us science! It was enjoyable and I learnt so much from these lessons. Arigato sayonara.

T A

●I love these lessons and I understood everything. I enjoy all science experiments that you did with us. I didn't know that if 1 liter of rice and beans, it won't be 2 liters but a little bit less. Your English is very good and I wish you can stay. Thanks for teaching us.

U A

●I have learned so much from the experiments that we have done like if an object is very small and hardly weighs anything, it needs a special kind of scale to see how much it weighs. I would like to thank Hiro sensei and Shige sensei for teaching us science and I also learned if you're standing on a scale with all your muscles, your weight will still be the same! I wish you could stay in our class forever! Never stop teaching because you are good at teaching. I wish you could stay. V A

●I think this lesson was very enjoyable because you were the best science teachers in room 12. What I learnt was the best was that when you pour saltwater evaporating dish onto an alcohol lamp onto a wire mesh, it will turn to salt. Thank you so much for teaching us. You guys were the best science teachers in room twelve! Hop you enjoyed my made up science. W A

●Thank you for coming in and teaching us about science! Something I learnt is that if you eat 200g of food and you weigh 32kg you will weigh 32.200kg as soon as you put the food in your mouth. I also learnt that if you have 1 liter of beans and 1 liter of rice and pour them together they will be 1.97 liters. Thank you for coming in and I hope you had a great time! Never stop teaching! We will miss you! Bye!

P.S Say hi to your science class from us. X A
